## DEPARTMENT OF PHYSICS

### Action Taken Report on Students' Feedback

After the question-wise responses has been analyzed based on the feedback collected from the students of the department, the following are the areas on which improvements were necessitated and action taken against them:

Sl. No.	Parameters	Action Taken
1.	Modern teaching aids are used by most of the teachers while teaching	Though the faculties of the department has been using Google Classroom, WhatsApp, etc. to upload the notes and sending PDF/ Word files from time to time, about 32% of respondents either are neutral or disagrees that the department is using the modern teaching aids. It has more or less has been taken care off by sending web-resources and e-content during the winter break. Unlike many other departments, the department of Physics was not having a projector installed in the allotted classrooms. Now, that a projector has been ordered which will be exclusively used by the department as it will be fixed in one the class rooms which will be used by the department, the department hopes that in the future the students will be responding to this question in a more affirmative way.
2.	The institute responds timely to your grievances to your satisfaction	More than 35 % of the respondents either disagrees or are neutral with regard to this question. As it mainly deals with the management, it has been communicated to the management and the department hopes that in due course of time the management will fast track to address their grievances.
3.	Washroom cleanliness and maintenance	Almost 39% of the students think that the washrooms are poorly or averagely maintained. Though the college tries to maintain the washroom clean, sometimes it becomes impossible during the college hours to fully comply as there are huge number of students. Efforts are made by the college authorities to ensure both boys and girls washrooms well-maintained, reduce foul-smelling and keep them clean.
4.	Canteen facilities	About 42 % of the students have responded that the canteen facilities are either poor or average. Though the Canteen Committee of the college regularly inspects the canteen, probably more needs to be done and after the re-opening of the college in February 2023, specific efforts will be made to ensure prices are reasonable, hygiene and cleanliness are maintained and more options in terms of choice of food stuffs are available to the students. The department will be communicating to the Canteen Committee regarding this.
