8	The books prescribed/listed as reference materials are relevant, updated and appropriate.	64.00

The percentage allotted is the average percentage of the nine departments that are present for arts, 5 departments for science and 1 department as a whole for commerce program of the college. When we analyze the questioner individually for each department for a program the following points are noted.

- In Arts, since there is only one department (Geography) that has practicals, so the average percentage for the balance between Theory and Lab for each department is very low for the other eight departments.
- Also, the faculty of the departments of Economics and Sociology are of the opinion that the course does not provide sufficient number of optional papers taking into account that the average for the same question in these two departments is less than 50%.
- For Science, the department of Mathematics doesn't have any practical and so the average percentage is only 52%. All other departments have given a score more than 50%.
- Also, the faculty of the department of chemistry is of the opinion that the course does not provide sufficient number of optional papers taking into account that the average for the same question in this department is less than 50%.
- Since commerce is a single department, the average percentage shown above gives us an idea of the opinion of the faculty members on the curriculum.
