

Class Seminar for 5th Semester students, 2023

Department of Physics, Don Bosco College, Tura

A students' seminar was organized by the Department of Physics, under the charge of Dr. Yubaraj Sharma on the 23rd of August and the 6th of September, 2023 for the 5th Semester students. The seminar was a part of continuous internal assessment.

Each student was assigned a topic based on his/her interest and allotted about 15 minutes to present his/her presentation on the white board or using PowerPoint through overhead projectors as desired by the group. Two groups (Group-B and Group-D) used projector for their presentation, others used the whiteboard. The seminar was conducted in the Physics laboratory. One absentee was given a chance to present at a later date (6th September, 2023).

This exercise had three-fold advantage in that the students were given a platform to exercise their public speaking skills, the topics were mostly relevant for their upcoming exams and the allocation of internal marks provided incentive to take this task seriously. The seminar concluded satisfactorily.
